

KRI SA – modern-day gas supplier

2009-01-19

KRI SA is a power company specializing in modern, high-class solutions based on natural gas and LNG. KRI SA offers :

- high-methane natural gas through regular distribution channels
- modern LNG technology where gas pipelining is not possible

KRI SA is licensed by the Energy Regulatory Authority (URE) to trade, distribute, liquefy and regasify natural gas and to sell and buy gas abroad.

As a gas distributor KRI SA makes use of:

- hundreds of kilometers of high- and medium-pressure gas pipelines
- professional LNG regasification stations
- numerous first- and second-grade reduction and monitoring stations

KRI SA was founded in 2000 after separation from PBG SA Group. Today the company is a capital group itself with two subsidiaries – PGS (PGS Sp. z o. o.), Poland's biggest LNG transporter, and API Testo (API Testo Sp. z o. o.), an SPV unit founded to market and distribute gas.

KRI SA is a Polish company with mixed Polish-foreign capital. The Polish stakeholder is PBG SA, a leading engineering firm specializing in LNG and gas projects. Thanks to PBG KRI SA has access to latest technology and expertise, as well as major energy projects.

Secure funding and modern technology allow KRI SA to raise innovation and adjust to a fast-changing market. The company's pursuits range from regasification and cryogenic fuel storage to cogeneration, the latter conducted in keeping with EU directives on saving primary fuel, raising power efficiency and reducing greenhouse emissions.

KRI employs a team of top-class professionals well abreast of latest gas and LNG technologies, and with a good eye for customer needs.

Especially noteworthy among the solutions offered by KRI SA are:

- cogeneration,
- production steam,
- technological heat.

The company's main goal is a dynamic rise in gas sales, thanks to which it hopes to win and maintain a leading position among Polish gas distributors.

One of the company priorities is expansion of the domestic distribution network to ensure:

- more investment in gas-undersupplied regions
- more investment in gas-based electricity
- higher national energy safety levels due to the diversification of natural gas sources
- more investment in Polish special economic zones

KRI SA regards its mission as being a flexible, customer-friendly energy company which answers to the most complex customer needs.
